NEW HORIZON COLLEGE OF ENGINEERING

Autonomous College Permanently Affiliated to VTU, Approved by AICTE & UGC
Accredited by NAAC with 'A' Grade, Accredited by NBA

The Trust is a Recipient of Prestigious Rajyotsava State Award 2012 Conferred by the Government of Karnataka
Awarded Outstanding Technical Education Institute in Karnataka-2016
Ring Road, Bellandur Post, Near Marathalli, Bangalore -560 103, INDIA

Academic Year 2020-21

ISE – Information Science & Engineering

Third and Fourth Semester

Scheme and Syllabus

CONTENTS

VISION

To evolve as a centre of academic excellence and advanced research in information science and engineering discipline and to endeavour the computational competence of students for their dream career achievement and enhancing the managerial and technical skills.

MISSION

To inculcate students with profound understanding of fundamentals related to discipline, attitudes, skills and their application in solving real world problems, with an inclination towards societal issues and research.

Program Education objectives (PEOs)

PEO1	To excel in their professional career with expertise in providing solutions to Information Technology problems.
PEO2	To pursue higher studies with profound knowledge enriched with academia and industrial skill sets.
PEO3	To exhibit adaptive and agile skills in the core area of Information Science & Engineering to meet the technical and managerial challenges.
PEO4	To demonstrate interpersonal skills, professional ethics to work in a team to make a positive impact on society.

PEO to Mission Statement Mapping

Mission Statements	PEO1	PEO2	PEO3	PEO4
To prepare the students with academic and industry exposure by empowering and equipping them with necessary domain knowledge.	3	2	2	2
To prepare the students for global career in information technology with relevant technical and soft skills.	3	2	2	2
To encourage students to participate in co-curricular and extracurricular activities leading to the enhancement of their social and professional skills.	2	2	3	3

Correlation: 3- High, 2-Medium, 1-Low

Program Specific Outcomes(PSO's)

PSO1: The ability to understand, analyze and develop computer programs in the areas related to algorithms, system software, multimedia, web design, big data analytics and networking or efficient design of computer based systems of varying complexity.

PSO2: The ability to apply standard practices and strategies in software project development using innovative ideas and open ended programming environment with skills in teams and professional ethics to deliver a quality product for business success.

Program Outcomes (PO) with Graduate Attributes

	Graduate Attributes	Program Outcomes (POs)
1	Engineering Knowledge	**PO1:** The basic knowledge of Mathematics, Science and Engineering.
2	Problem analysis	**PO2:** An Ability to analyze, formulate and solve engineering problems.
3	Design and Development of Solutions	**PO3:** An Ability to design system, component or product and develop interfaces among subsystems of computing.
4	Investigation of Problem	**PO4:** An Ability to identify, formulate and analyze complex engineering problem and research literature through core subjects of Computer Science.
5	Modern Tool usage	**PO5:** An Ability to use modern engineering tools and equipments for computing practice.
6	Engineer and society	**PO6:** An Ability to assess societal, health, cultural, safety and legal issues in context of professional practice in Computer Science & Engineering.
7	Environment and sustainability	**PO7:** The broad education to understand the impact of engineering solution in a global, economic, environmental and societal context.
8	Ethics	**PO8:** An understanding of professional and ethical responsibility.
9	Individual & team work	**PO9:** An Ability to work both as individual and team player in achieving a common goal.
10	Communication	**PO10:** To communicate effectively both in written and oral formats with wide range of audiences.
11	Lifelong learning	**PO11:** Knowledge of contemporary issues, Management and Finance.
12	Project management and finance	**PO12:** An Ability to recognize the need and thereby to engage in independent and life-long learning for continued professional and career advancement.

Mapping of POs with PEOs

THIRD SEMESTER

(SYLLABUS)

APPLIED MATHEMATICS – III

Course Code : 19CSE31/19ISE31 **Credits : 03**
L:T:P : 2:1:0 **CIE Marks : 50**
Exam Hours : 03 **SEE Marks : 50**

Course Outcomes: At the end of the Course, the Student will be able to do the following:

CO1	Use appropriate numerical methods to solve algebraic equations and transcendental equations
CO2	Solve initial value problems using appropriate numerical methods and also Evaluate definite integrals numerically
CO3	Fit a suitable curve by the method of least squares and determine the lines of regression for a set of statistical data and obtain the extremal of a functional.
CO4	Gain ability to use probability distributions to analyze and solve real time problems
CO5	Apply the concept of sampling distribution to solve engineering problems
CO6	Use the concepts to analyze the data to make decision about the hypothesis

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	3	3	3	2	2	-	-	-	1	1	-	2
CO2	3	3	3	2	2	-	-	-	1	1	-	2
CO3	3	3	3	2	2	-	-	-	1	1	-	2
CO4	3	3	3	2	2	-	-	-	1	1	-	2
CO5	3	3	3	2	2	-	-	-	1	1	-	2
CO6	3	3	3	2	2				1	1		2

Course Syllabus			
Module No.	**Contents of the Module**	**Hours**	**Co's**
1	**Numerical Methods-1:** Numerical solution of algebraic and transcendental equations: Regula-falsi method and Newton-Raphson method-Problems. Interpolation: Newton's forward and backward formulae for equal intervals, Newton divided difference and Lagrange's formulae for unequal intervals (without proofs)-Problems.	**9L + 2T**	**CO1**
2	**Numerical Methods 2:** Numerical solution of ordinary differential equations of first order and o first degree: Modified Euler's method and Runge-Kutta method of fourth-order-Problems. Milne's predictor and corrector methods-Problems. Numerical integration: Simpson's $1/3^{rd}$ rule, Simpson's $3/8^{th}$ rule, Weddle's rule (without proofs)-Problems. **Applications:** Application of numerical integration to velocity of a	**9L + 2T**	**CO2**

	particle and volume of solids.		
3	**Statistical Methods and Calculus of Variation:** Fitting of the curves of the form $y = a + bx$, $y = a + bx + cx^2$, $y = ae^{bx}$, $y = ax^b$, and $y = ab^x$ by the method of least square-Problems.Correlation and Regression lines-Problems. Variation ofa function and a functional, Variational problems, Euler's equation and Isoperimetric problems. **Applications:** Minimal surface of revolution and Hanging cable.	**9L + 2T**	**CO3**
4	**Probability distributions:** Random variables (discrete and continuous), probability density functions. Discrete Probability distributions: Binomial and Poisson distributions-Problems. Continuous Probability distributions: Exponential and Normal distributions-Problems. **Joint Probability distributions:** Mathematical expectation, correlation, covariance (discrete random variables only)-Problems.	**9L + 2T**	**CO4**
5	**Sampling Theory:** Sampling, Sampling distributions, test of hypothesis of large samples for means and proportions, confidence limits for means, Student's t-distribution, F-distribution and Chi-square distribution for test of goodness of fit for small samples.	**9L + 2T**	**CO5, CO6**

ECONOMICS FOR ENGINEERS

Course Code : 19HSS321/421 **Credits : 02**
L:T:P : 2:0:0 **CIE MARKS : 25**
Exam Hour : 03 **SEE MARKS : 25**

Course Outcomes: On completion of the course, students should be able to:

CO1	Understand the importance of economics in decision making processes in a day to day life.
CO2	Analyze business environment at micro and macroeconomic level and its impact on industries in country's economy.
CO3	Acquire knowledge about costing and estimation of projects for profit making.
CO4	Apply principles of budgeting and finance for entrepreneurial success.

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	2	2	1	-	1	-	2	2	2	1	2	2
CO2	2	2	1	-	1	-	2	2	2	1	2	2
CO3	2	2	1	-	1	-	2	2	2	1	2	2
CO4	2	2	1	-	1	-	2	2	2	1	2	2

Module	Module Contents	Hrs	Cos
I	Introduction to Economics: Role of Engineer as an Economist, Types and problem of economies, Basics of economics (GDP, National income, inflation, business cycle, fiscal and monetary policies, balance of payment).	4	CO1,3
II	Basic concepts of Microeconomics: concept of Demand & Elasticity of Demand. Concept of Supply & Elasticity of Supply, Meaning of Production and factors of production, Production Possibility Curve, Law of variable proportions and returns to scale. Relevance of Depreciation towards industry, Depreciation computing methods.	5	CO2,3

III	Concepts of cost of production: different types of cost; accounting cost, sunk cost, marginal cost and opportunity cost. Break even analysis, Make or Buy decision. Cost estimation, Elements of cost as Direct Material Costs, Direct Labor Costs, Fixed Over-Heads, Factory cost, Administrative Over- Heads.	4	CO3,4
IV	Capital budgeting: Traditional and modern methods, Payback period method, IRR, ARR, NPV, PI. . Interest and Interest factors: Interest rate, Simple interest, Compound interest, Cash - flow diagrams, Personal Loans and EMI Payment. Present worth, Future worth.	4	CO1,3,4
V	Book Keeping and Accounts: Journal, Ledger, Trial balance, asset Types, profit & loss account, balance sheet.	5	CO1,2,3,4

ಆಡಳಿತ ಕನ್ನಡ

(Kannada for administration)

Course Code : 20HSS324/424	**Credits : 01**
L: T: P : 1:0:0	**CIE Marks : 25**
Exam Hours : 2	**SEE Marks : 25**

ಆಡಳಿತ ಕನ್ನಡ ಅಧ್ಯಯನದ ಕಲಿಕಾಂಶಗಳು

C01 ವಿದ್ಯಾರ್ಥಿಗಳು ಕನ್ನಡ ವ್ಯಾಕರಣದ ಬಗ್ಗೆ ಹಾಗೂ ಭಾಷಾ ರಚನೆ ನಿಯಮಗಳನ್ನು ಅರ್ಥೈಸಿಕೊಳ್ಳುತ್ತಾರೆ

C02 ಕನ್ನಡ ಭಾಷಾ ಬರಹದಲ್ಲಿನ ದೋಷಗಳು, ನಿವಾರಣೆ ಮತ್ತು ಲೇಖನ ಚಿಹ್ನೆಗಳನ್ನು ಅರಿತುಕೊಳ್ಳುವರು

C03 ಸರ್ಕಾರಿ ಮತ್ತು ಅರೆ ಸರ್ಕಾರಿ ಪತ್ರ ವ್ಯವಹಾರದ ಬಗ್ಗೆ ತಿಳುವಳಿಕೆ ಪಡೆಯುವರು

C04 ಭಾಷಾಂತರ ಮತ್ತು ಪ್ರಬಂಧ ರಚನೆ ಬಗ್ಗೆ ಆಸಕ್ತಿ ವಹಿಸಿಕೊಳ್ಳುವರು

CO – PO Mapping:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	-	-	-	-	-	-	-	-	-	3	-	-
CO2	-	-	-	-	-	-	-	-	-	3	-	-
CO3	-	-	-	-	-	-	-	-	-	3	-	-
CO4	-	-	-	-	-	-	-	-	-	3	-	-

ಪರಿವಿಡಿ (ಪಠ್ಯ ಪುಸ್ತಕದಲ್ಲಿರುವ ವಿಷಯಗಳ ಪಟ್ಟಿ)

ಅಧ್ಯಾಯ –1 ಕನ್ನಡ ಭಾಷೆ–ಸಂಕ್ಷಿಪ್ತ ವಿವರಣೆ

ಅಧ್ಯಾಯ –2 ಭಾಷಾ ಪ್ರಯೋಗದಲ್ಲಾಗುವ ಲೋಪದೋಷಗಳು ಮತ್ತು ಅವುಗಳ ನಿವಾರಣೆ

ಅಧ್ಯಾಯ –3 ಲೇಖನ ಚಿಹ್ನೆಗಳು ಮತ್ತು ಅವುಗಳ ಉಪಯೋಗ

ಅಧ್ಯಾಯ –4 ಪತ್ರ ವ್ಯವಹಾರ

ಅಧ್ಯಾಯ –5 ಆಡಳಿತ ಪತ್ರಗಳು

ಅಧ್ಯಾಯ –6 ಸರ್ಕಾರದ ಆದೇಶ ಪತ್ರಗಳು

ಅಧ್ಯಾಯ –7 ಸಂಕ್ಷಿಪ್ತ ಪ್ರಬಂಧ ರಚನೆ (ಪ್ರಿಸೈಸ್ ರೈಟಿಂಗ್),ಪ್ರಬಂಧ ಮತ್ತು ಭಾಷಾಂತರ

ಅಧ್ಯಾಯ –8 ಕನ್ನಡ ಶಬ್ದ ಸಂಗ್ರಹ

ಅಧ್ಯಾಯ –9 ಕಂಪ್ಯೂಟರ್ ಹಾಗೂ ಮಾಹಿತಿ ತಂತ್ರಜ್ಞಾನ

ಅಧ್ಯಾಯ –10 ಪಾರಿಭಾಷಿಕ ಆಡಳಿತ ಕನ್ನಡ ಪದಗಳು ಮತ್ತು ತಾಂತ್ರಿಕ /ಕಂಪ್ಯೂಟರ್ ಪಾರಿಭಾಷಿಕ ಪದಗಳು

ಆಡಳಿತ ಕನ್ನಡ ಪಠ್ಯಪುಸ್ತಕದ ಲೇಖಕರು

ಡಾ. ಎಲ್. ತಿಮ್ಮೇಶ, ಪ್ರೋ. ವಿ . ಕೇಶವಮೂರ್ತಿ, ಪ್ರಕಟಣೆ : ಪ್ರಸಾರಾಂಗ, ವಿ.ತಾ.ವಿ.ಬೆಳಗಾವಿ

ಪರೀಕ್ಷೆಯ ವಿಧಾನ:

ನಿರಂತರ ಆಂತರಿಕ ಮೌಲ್ಯಮಾಪನ (Continuous Internal Evaluation) : 25 ಅಂಕಗಳು

ಸೆಮಿಸ್ಟರ್ ಪರೀಕ್ಷೆ (Semester End Examination) : 25 ಅಂಕಗಳು

DIGITAL LOGIC DESIGN

Course Code :19ISE33		**Credits**	**: 03**
L:T:P:3:0:0	**CIE Marks**		**:50**
Exam Hours : 3	**SEE marks**		**:50**

Course Outcomes: At the end of the Course, the Student will be able to:

CO1	Understand the working of logic Gates and simplify Boolean function using Karnaugh maps and Quine Mc-Clusky method and implement functions with combinatorial circuits.
CO2	Analyze and design modular combinatorial logic circuits
CO3	Implementation of arithmetic logic circuits
CO4	Understand the Bi- stable elements like flip-flop and use its functionality to analyze and design the sequential circuits and its applications
CO5	Apply the concepts of state and state transition for the analysis and design of sequential circuits.
CO6	Implement the logical circuits using HDL.

Mapping of Course Outcomes to Program Outcomes

DATA STRUCTURES USING C

Course Code : 19ISE34 **Credits : 03**
L:T:P : 3:0:0 **CIE Marks : 50**
Exam Hours : 3 **SEE Marks : 50**

Course Outcomes: At the end of the Course, the Student will be able to:

CO1	Understand the fundamentals of data structures and their applications essential for programming/problem solving.
CO2	Analyze the operational aspects of linear data structures: stacks, queues in Problem solving.
CO3	Select an appropriate data structure for a specified application.
CO4	Understand and implement the concept of linked list data structure in Problem solving.
CO5	Analyze the operational aspects of non-linear data structures: Trees, Graphs in Problem solving.
CO6	Analyze various searching and sorting algorithms.

Mapping of Course Outcomes to Program Outcomes:

COMPUTER ORGANIZATION

Course Code : 19ISE35 **Credits : 03**
L: T: P : 3:0:0 **CIE Marks : 50**
Exam Hours : 3 **SEE Marks : 50**

Course Outcomes: At the end of the Course, the Student will be able to:

CO1	Gain the Technical knowledge of how computers are constructed out of a set of functional units and how the functional units operate, interact, and communicate
CO2	Evaluate the merits and pitfalls in computer performance measurements.
CO3	Analyze the memory hierarchy and its impact on computer cost/ performance
CO4	Gain the Technical knowledge on representation of data at the machine level and how computations are performed at the machine level.
CO5	Analyze internal structure of a processor and how the control signals are generated in sequence
CO6	Analyze the various ways in which input, output operations are performed.

Mapping of Course Outcomes to Program Outcomes:

CO/ PO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12

PYTHON PROGRAMMING

Course Code : 19ISE36 **Credits : 03**
L:T:P : 3:0:0 **CIE Marks : 50**
Exam Hours : 3 **SEE Marks : 50**

Course Outcomes: At the end of the Course, the Student will be able to:

CO1	Understand the benefits of python programming over other languages and program using python language.
CO2	Develop high order functions, file handling modules in Python language.
CO3	Implement new data structures in python to handle real world data.
CO4	Model the real world entities as classes and objects using python object oriented programming concepts.
CO5	Apply exception handling and gain efficient testing, debugging skills in python.
CO6	Develop File Processing applications based on python programming libraries.

Mapping of Course Outcomes to Program Outcomes:

CO/PO	**PO1**	**PO2**	**PO3**	**PO4**	**PO5**	**PO6**	**PO7**	**PO8**	**PO9**	**PO10**	**PO11**	**PO12**

DIGITAL LOGIC DESIGN - LABORATORY

Course Code : 19ISL37 **Credits : 1**
L:T:P : 0:0:1 **CIE Marks : 25**
Exam Hours : 3 **SEE Marks : 25**

Course Outcomes: At the end of the Course, the Student will be able to:

CO1	Analyze and design modular combinatorial logic circuits.
CO2	Realize the Flip flops and verify the truth table
CO3	Design of sequential circuits
CO4	Implement the logical circuits using HDL.

Mapping of Course Outcomes to Program Outcomes

CO/PO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	3	3	3	2	3	1	1	1	1	1	1	2
CO2	3	3	3	2	3	1	1	1	1	1	1	2
CO3	3	3	3	2	3	1	1	1	1	1	1	2
CO4	3	3	3	2	3	1	1	1	1	1	1	2

Experiment No.	Experiment
PART-A	
1	Given a 4-variable logic expression, simplify it using Entered Variable Map

	and realize the simplified logic expression using 8:1 multiplexer IC.
2	Perform n bit addition / subtraction using 4 bit full adder IC.
3	Realize JK, D and T Flip-Flops and verify its truth table
4	Design and implement Ring counter and Johnson counter using 4-bit shift register and demonstrate its working.
5	Design and implement a mod-n (n<8) synchronous up or down counter using J-K Flip-Flop ICs and demonstrate its working.
PART-B	
6	Simulate and verify the working of 8:1 multiplexer using Verilog code.
7	Simulate and verify the working of n bit adder/subtractor using Verilog code.
8	Simulate and verify the working of the JK,D and T Flip flop using Verilog code.
9	Simulate and verify the working of Ring and Johnson Counter using Verilog code.
10	Simulate and verify mod 8 synchronous up or down counter using Verilog code.

Note:
For SEE Examination:

- One experiment from part A & One experiment from part B to be given
- Examination will be conducted for 50 marks and scaled down to 25 marks
- Marks Distribution : Procedure write-up – 20%
  Conduction – 60%
  Viva – Voce – 20%
  - Change of the experiment is allowed only once and procedure write-up marks will be considered as '0'

DATA STRUCTURES USING C - LABORATORY

Course Code	**: 19ISL38**	**Credits**	**: 1.5**
L:T:P	**: 0:0:1.5**	**CIE Marks**	**: 25**
Exam Hours	**: 3**	**SEE Marks**	**: 25**

Course Outcomes: At the end of the Course, the Student will be able to:

CO1	Analyze the operational aspects of linear data structures: stacks, queues in Problem solving.
CO2	Implement the concept of linked list data structure in Problem solving.
CO3	Analyze the operational aspects of non-linear data structures: Trees, Graphs in Problem solving.
CO4	Apply various searching and sorting algorithms.

Mapping of Course Outcomes to Program Outcomes:

CO/PO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	3	3	3	2	3	1	-	1	-	-	-	2
CO2	3	3	3	2	3	1	-	1	-	-	-	2
CO3	3	3	3	2	3	1	-	1	-	-	-	2
CO4	3	3	3	2	3	1	-	1	-	-	-	2

Experiment No.	Experiment
	PART-A
1	Design, Develop and Implement a menu driven Program in C for the following array operations. a. Creating an array of N Integer Elements b. Display of array Elements with Suitable Headings c. Inserting an Element (ELEM) at a given valid Position (POS) d. Deleting an Element at a given valid Position (POS) e. Exit. Support the program with functions for each of the above operations.
2	Design, Develop and Implement a Program in C for the following operations on Strings. a. Read a main String (STR), a Pattern String (PAT) and a Replace String (REP) b. Perform Pattern Matching Operation: Find and Replace all occurrences of PAT in STR with REP if PAT exists in STR. Report suitable messages in case PAT does not exist in STR. Support the program with functions for each of the above operations. Don't use Built-in functions.

3	Design, Develop and Implement a Program in C to create a structure to store the name, account number and balance of customers (more than 10) and store theirinformation. 1 - Write a function to print the names of all the customers having balance lessthan$200. . 2 - Write a function to add $100 in the balance of all the customers having more than $1000 in their balance and then print the incremented value of their balance.
4	Design, Develop and Implement a menu driven Program in C for the following operations on STACK of Integers (Array Implementation of Stack with maximum size MAX) a. Push an Element on to Stack b. Pop an Element from Stack c. Demonstrate how Stack can be used to check Palindrome d. Demonstrate Overflow and Underflow situations on Stack e. Display the status of Stack f. Exit Support the program with appropriate functions for each of the above operations
5	Design, Develop and Implement a Program in C for converting an Infix Expression to Postfix Expression. Program should support for both parenthesized and free parenthesized expressions with the operators: +, -, *, /, % (Remainder), ^ (Power) and alphanumeric operands.
6	Design, Develop and Implement a Program in C for the following Stack Applications a. Evaluation of Postfix expression with single digit operands and operators: +, -, *, /, %, ^. b. Solving Tower of Hanoi problem with n disks.
PART-B	
7	Design, Develop and Implement a menu driven Program in C for the following operations on Circular QUEUE of Characters (Array Implementation of Queue with maximum size MAX) a. Insert an Element on to Circular QUEUE b. Delete an Element from Circular QUEUE c. Demonstrate Overflow and Underflow situations on Circular QUEUE d. Display the status of Circular QUEUE e. Exit Support the program with appropriate functions for each of the above operations
8	Design, Develop and Implement a menu driven Program in C for the following operations on Singly Linked List (SLL) of Student Data with the fields: USN, Name, Branch, Sem, PhNo a. Create a SLL of N Students Data by using front insertion. b. Display the status of SLL and count the number of nodes in it c. Perform Insertion / Deletion at End of SLL d. Perform Insertion / Deletion at Front of SLL(Demonstration of stack) e. Exit

9	Design, Develop and Implement a menu driven Program in C for the following operations on Doubly Linked List (DLL) of Employee Data with the fields: SSN, Name, Dept, Designation, Sal, PhNo a. Create a DLL of N Employees Data by using end insertion. b. Display the status of DLL and count the number of nodes in it c. Perform Insertion and Deletion at End of DLL d. Perform Insertion and Deletion at Front of DLL e. Demonstrate how this DLL can be used as Double Ended Queue. f. Exit
10	Using circular representation for a polynomial, design, develop, and execute a program in C to accept two polynomials, add them, and then print the resulting polynomial.
11	Design, Develop and Implement a menu driven Program in C for the following operations on Binary Search Tree (BST) of Integers. a. Create a BST of N Integers: 6, 9, 5, 2, 8, 15, 24, 14, 7, 8, 5, 2 b. Traverse the BST in Inorder, Preorder and Post Order c. Search the BST for a given element (KEY) and report the appropriate message d. Exit
12	Construct a dictionary of key-value pairs using Tree and search for a value matching a key.

For SEE Examination:

- One experiment from part A & One experiment from part B to be given
- Examination will be conducted for 50 marks and scaled down to 25 marks
- Marks Distribution : Procedure write-up – 20%
  Conduction – 60%
  Viva – Voce – 20%
  - Change of the experiment is allowed only once and procedure write-up marks will be considered as '0'

PYTHON PROGRAMMING LABORATORY

Course Code	**: 19ISL39**	**Credits**	**: 1.5**
L:T:P	**: 0:0:1.5**	**CIE Marks**	**: 25**
Exam Hours	**: 3**	**SEE Marks**	**: 25**

Course Outcomes: At the end of the Course, the Student will be able to:

CO1	Develop high order functions, file handling modules in Python language.
CO2	Implement new data structures in python to handle real world data.
CO3	Model the real world entities as classes and objects using python object oriented programming concepts.
CO4	Develop File Processing applications based on python programming libraries.

Mapping of Course Outcomes to Program Outcomes:

CO/PO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	3	3	3	2	3	-	1	1	-	1	-	1
CO2	3	3	3	2	3	-	1	1	-	1	-	1
CO3	3	3	3	2	3	-	1	1	-	1	-	1
CO4	3	3	3	2	3	-	2	1	-	1	-	1

Experiment No.	Experiment
	PART-A
1	a. Design and Implement a Python program to accept 3 digits from the user and print all possible combination from digits. b. Create a Python program to take two command line inputs and compute the GCD and LCM of these two numbers.
2	a. Create a Python program to find the sum of natural numbers up to n using recursive function b. Design and Develop a Python Program to Create a Dictionary with Key as First Character and Value as Words Starting with that Character.
3	a. A list rotation consists of taking the last element and moving it to the front. Forinstance, if we rotate the list [1,2,3,4,5], we get [5,1,2,3,4]. If we rotate it again, we get [4,5,1,2,3]. Write a Python function *rotatelist(ls,k)* that takes a list ls and a positive integer k and returns the list ls after k rotations. If k is not positive, your functionshould return ls unchanged. Note that your function should not change ls itself, and should return the rotated list. Here are some examples to show how your function shouldwork. >>>rotatelist([1,2,3,4,5],1) #output is [5, 1, 2, 3, 4] >>>rotatelist([1,2,3,4,5],3) #output is [3, 4, 5, 1, 2]

	>>>rotatelist([1,2,3,4,5],12) #output is [4, 5, 1, 2, 3] b. Design and implement a python code that accepts two string from user and displays the characters which are present in both the strings. Use Set sequence type to achieve the same.
4	a. Implement a Python program to count the numbers of characters in the string and store them in a dictionary data structure b. Develop a Python program print to first 10 lines and last 10 lines in a file.
5	a. Design a python program to compute the number of characters, words and lines in a file.Also Print the most frequent words read from the file. **b.** Apply import,from, * and other module related concepts to create a module called "calc" consists of 4 function that should return sum, division, multiplication and subtraction. Create another module caller "user",import the calc module and illustrate the use of all the functions of calc module.
6	Design & Implement the program in python to demonstrate sending Email and Text messages over the web.
PART-B	
7	Design and Develop a Python Program to Append, Delete and Display Elements of a List Using Classes and Objects.
8	Design and Implement a Python Program to perform addition, subtraction, multiplication of two complex numbers using binary operators overloading.
9	Demonstrate the concept of Method Resolution order in multiple inheritance Python Program.
10	Create a Python Program to take care of Number Format Exception if user enters values other than integer for calculating average marks of 2 students. The name of the students and marks in 3 subjects are taken from the user while executing the program. • In the same Program create your own Exception classes to take care of Negative values and values out of range (i.e. other than in the range of 0-100) • Include finally to output the statement "Program terminated".
11.	Design & Implement the program in python to Manipulate images
12	Design & Implement the program in python to handle the events in an Application

For SEE Examination:

- One experiment from part A & One experiment from part B to be given
- Examination will be conducted for 50 marks and scaled down to 25 marks
- Marks Distribution : Procedure write-up – 20%
  Conduction – 60%
  Viva – Voce – 20%

MINI PROJECT

Course Code : 19ISE391 **Credits : 2**
CIE Marks : 25 **SEE Marks : 25**
Exam Hours : 3

Course Outcomes: At the end of the Course, the Student will be able to:

CO1	Analyze the Real world problem through survey of existing problems
CO2	Design the modules for solving the problems identified
CO3	Implement the design modules with suitable programming language
CO4	Test the working modules at different levels

Mapping of Course Outcomes to Program Outcomes:

CO/PO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	3	3	3	2	3	-	1	1	3	1	3	2
CO2	3	3	3	2	3	-	1	1	3	1	3	2
CO3	3	3	3	2	3	-	1	1	3	1	3	2
CO4	3	3	3	2	3	-	2	1	3	1	3	2

Use C,C++,Java, C#, PHP, Python, or any other similar front-end tool. All applications must be demonstrated on desktop/laptop as a stand-alone or web based application.

Note :

- Every student should do individual mini project in the areas suggested by the department expert committee
- Minimum 2 reviews will be conducted by the department expert committee to know the progress of the mini project work
- In each review student should give presentation on the work carried out and show the relevant models
- A mini project report should be submitted to the department at the end of the mini project work
- Plagiarism check for the report : Similarity index of the report should not exceed more than 25%

FOURTH SEMESTER

(SYLLABUS)

DISCRETE MATHEMATICS AND GRAPH THEORY

Course Code: 19CSE41/19ISE41 **Credits: 03**
L: T: P: S: 2:1:0:0 **CIE Marks: 50**
Exam Hours : 03 **SEE Marks: 50**

Course Outcomes: At the end of the Course, the Student will be able to:

CO1	Verify the correctness of an argument using propositional and predicate logic and truth tables.
CO2	Demonstrate the ability to solve problems using counting techniques and combinatorics in the context of discrete probability.
CO3	Solve problems involving relations and functions.
CO4	Apply Pigeon hole principle to solve real life problems
CO5	Ability to represent and apply graph theory in solving computer science problems.
CO6	Illustrate the fundamental concepts of trees, connectivity and planarity graphs

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	3	3	2	3	1	-	-	-	1	3	-	2
CO2	3	3	2	3	1	-	-	-	1	3	-	2
CO3	3	3	2	3	1	-	-	-	1	3	-	2
CO4	3	3	2	3	1	-	-	-	1	3	-	2
CO5	3	3	2	3	1	-	-	-	1	3	-	2
CO6	3	3	2	3	1	-	-	-	1	3	-	2

Course Syllabus			
Module No.	**Contents of the Module**	**Hours**	**CO's**
1	**Mathematical Logic:** Basic Connectives and Truth Tables, Tautology and Contradiction, Logic Equivalence, The Laws of Logic, Logical Implication, Rules of Inference, Quantifiers Definition and the use of Quantifiers in logical implication.	**9L + 2T**	**CO1**
2	**Properties of the Integers**: The Well Ordering Principle, Mathematical Induction, Fundamental Principles of Counting: The Rules of Sum and Product, Permutations, Combinations, The Binomial Theorem.	**9L + 2T**	**CO2**
3	**Relations and Functions**: Cartesian Products and Relations, One-to-One and Onto functions. The Pigeon hole Principle, Function Composition and Inverse Functions. Properties of Relations, Equivalence Relations and Partitions	**9L + 2T**	**CO3, CO4**
4	**Graph Theory:** Graphs-Definitions and examples, Sub graphs, Walks, Paths, Circuits, Connectedness, Components, graph isomorphism, Euler graphs, Hamiltonian paths and cycles. Trees, Properties of trees, Distance and centers in tree, Rooted and binary trees.	**9L + 2T**	**CO5**

5	**Trees, Connectivity and Planarity**: Spanning trees , Fundamental circuits, Spanning trees in a weighted graph, cut sets, Properties of cut set, All cut sets, Fundamental circuits and cut sets, Connectivity and separability, Network flows, 1-Isomorphism, 2-Isomorphism, Combinational and geometric graphs, Planar graphs, Different representation of a planar graph.	**9L + 2T**	**CO6**

TEXT BOOKS:

1. Ralph P. Grimaldi, Discrete and Combinatorial Mathematics, 5th Edition, Pearson Education, 2004.

LIFE SKILLS FOR ENGINEERS

Course Code : 19HSS422 | **Credits : 03**
L: P: T: : 3:0:0 | **CIE Marks : 50**
Exam Hours : 3 | **SEE Marks : 50**

Course Outcomes: At the end of the course, the student will be able to:

CO1	Set personal and professional goals
CO2	Develop his critical thinking skills and practise creativity.
CO3	Demonstratean understanding of personal and professional responsibility
CO4	Apply the concepts of personality development and grooming in real life
CO5	Understand self and work with groups
CO6	Articulate and convey his ideas and thoughts with clarity and focus

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12

ENVIRONMENTAL SCIENCE AND AWARENESS

Course Code : 19HSS423 **Credits :** 0

L : T : P : 0:0:0 **CIE Marks :** 25

Exam Hours : 02 Hrs **SEE Marks :** 25

Course Outcomes: At the end of the Course, the student will be able to:

CO1	Understand the concepts of environment, ecosystem, biodiversity and its interdependence on human life.
CO2	Develop an insight on types of natural resources and the concept of sustainable development.
CO3	Understand the different control measures of pollution and importance of waste management.
CO4	Think and apply technology as a solution for environment related concerns, keeping in view the different environmental acts and amendments.

Mapping of Course Outcomes to Program Outcomes:

CO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	1	1	1	1	1	3	3	3	1	1	1	1
CO2	2	1	1	1	1	3	3	3	1	1	1	3
CO3	3	3	3	3	3	3	3	3	3	1	2	3
CO4	3	3	3	3	3	3	3	3	3	1	3	3

Module No.	Content of Module	Hrs	COs
1	**Introduction to Environment, Ecosystem and biodiversity:** Environment - Components of Environment, Scope and importance of Environmental studies, Ecosystem: Types & Structure of Ecosystem, Energy flow in the ecosystem, Food chains – food webs & ecological pyramids. Biodiversity – Definition, Hot-spots of biodiversity, Threats to biodiversity, Conservation of biodiversity.	05	CO1
2	**Natural Resources:** Renewable and non-renewable resources – Natural resources and associated problems. Role of an individual in conservation of natural resources. Water conservation, rain water harvesting. Balanced use of resources for sustainable lifestyle – strategies.	04	CO2
3	**Environmental Pollution:** Definition, Causes, effects and control measures of Air Pollution, Water Pollution, Soil Pollution, Marine Pollution, Noise pollution, Thermal Pollution and Nuclear hazards. Role of an individual in prevention of pollution - Waste management – urban and industrial wastes.	04	CO3

4	**Social Issues and Environment:** Environmental ethics – issues and possible solutions. Environment protection act – Air (prevention and Control of pollution) act & Water (prevention and Control of pollution) act. Role of government: Swatch Bharat Abhiyan, National Mission for Clean Ganga (NMCG), River rejuvenation, Role of Non-governmental Organizations (NGOs), Global warming and climate change.	04	CO3 CO4
5	**Human Population and Environment:** Population growth & explosion, Family welfare programme. Environment and human health, Human rights, Value education. Role of Technology in protecting environment and human health.	05	CO4

DATABASE MANAGEMENT SYSTEMS

Course Code : 19ISE43 **Credits: 03**
L: T: P : 3:0:0 **CIE Marks: 50**
Exam Hours : 3 **SEE Marks: 50**

Course Outcomes: At the end of the course the student will be able to:

CO1	Understand the database concepts, different database models, and database management systems and design database schema.
CO2	Develop the ER structures for real world examples using the concept of Entity Relationship models with constraints and cardinalities.
CO3	Understand the concepts of Normalization and design database which possess no anomalies.
CO4	Apply the concepts of relational database theory to manage relational database management system.
CO5	Apply the concepts of triggers, embedded and dynamic SQL.
CO6	Implement database applications in SQL.

Mapping of Course Outcomes with Program Outcomes

OBJECT ORIENTED PROGRAMMING WITH JAVA

Course Code : 19ISE44 **Credits : 03**
L:P:T : 3:0:0 **CIE Marks : 50**
Exam Hours : 3 **SEE Marks : 50**

Course Outcomes: At the end of the Course, the Student will be able to:

CO1	Model the real world applications using Object Oriented Programming concepts.
CO2	Identify the importance of inheritance andinterface concepts
CO3	Analyze the importance of exception handling and learn the importance of string handling
CO4	Apply the concept of Multithreading in concurrent programming
CO5	Develop applications using collections framework for managing user defined types
CO6	Solve the real world problems using Object Oriented concepts and collection framework in Java.

Mapping of Course Outcomes to Program Outcomes:

OPERATING SYSTEMS

Course Code : 19ISE45 **Credits: 03**
L:P:T : 3:0:0 **CIE Marks: 50**
Exam Hours : 3 **SEE Marks : 50**

Course Outcomes: At the end of the Course, the Student will be able to:

CO1	Understand the concept of services provided by and the structure of an operating system.
CO2	Compare, implement and know when to apply various process scheduling algorithms
CO3	Ability to Learn and implement various operations on deadlock
CO4	Evaluate the efficiency aspect of using system resources and memory management schemes
CO5	Handle operations like disk scheduling and file operations.
CO6	Ability to handle files in UNIX

Mapping of Course Outcomes to Program Outcomes

DATABASE MANAGEMENT SYSTEMS LABORATORY

Course Code : 19ISL46 **Credits: 2**
L: T: P : 0:0:2 **CIE Marks: 25**
Exam Hours : 3 **SEE Marks: 25**

Course Outcomes: At the end of the course the student will be able to:

CO1	Develop the ER structures for real world examples using the concept of Entity Relationship models with constraints and cardinalities.
CO2	Apply the concepts of relational database theory to manage relational database management system.
CO3	Apply the concepts of triggers, embedded and dynamic SQL.
CO4	Implement database applications in SQL.

Mapping of Course Outcomes with Program Outcomes

CO/PO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	3	2	3	2	3	-	1	1	-	1	-	1
CO2	3	2	3	2	3	1	1	1	-	1	-	1
CO3	3	2	3	2	3	-	1	1	-	1	-	1
CO4	3	2	3	2	3	-	1	1	-	1	-	1

Common set of operations to be carried out for all the experiments:

1. Creation of tables, insertion of values with Data Definition Commands (use constraints while creating tables) and exercises on Data Manipulation Commands.

2. Developing Queries using clauses SELECT, FROM, WHERE, GROUP BY, HAVING.
3. Developing Queries using clauses Aggregate functions COUNT, SUM, AVG, MAX and MIN.
4. Developing Queries (along with NESTED Queries) using ANY, ALL, IN, EXISTS, NOTEXISTS, UNION, INTERSECT Constraints. Creation and Manipulation of Views.
5. Creation of simple PL/SQL programs and usage of cursor and triggers.
6. Procedure implementation

List of Experiments are as follows:

Experiment No.	Experiment
PART-A	
1	Class marks management system
2	Accounting package for a shop
3	Database manager for Magazine and news paper agency
4	Ticket booking for performances
5	Personal accounts – Insurance ,loans etc
6	Doctors diary and Billing systems
7	Hostel accounting
PART-B	
8	Video tape library
9	History of cricket scores
10	Cable TV transmission manager
11	Personal library
12	Project management system
13	Placement data management
14	Students club management system

For SEE Examination:

- One experiment from part A & One experiment from part B to be given
- Examination will be conducted for 50 marks and scaled down to 25 marks
- Marks Distribution : Procedure write-up – 20%
  Conduction – 60%
  Viva – Voce – 20%
- Change of the experiment is allowed only once and procedure write-up marks will be considered as '0'

OBJECT ORIENTED PROGRAMMING WITH JAVA LABORATORY

Course Code : 19ISL47 **Credits : 1.5**
L:T:P : 0:0:1.5 **CIE Marks : 25**
Exam Hours : 3 **SEE Marks : 25**

Course Outcomes: At the end of the Course, the Student will be able to:

CO1	Design applications based on inheritance and interfacing concepts.
CO2	Develop solutions applying multithreading concepts in concurrent programming.
CO3	Develop applications using collections for managing user defined types
CO4	Apply the OOPS concepts to create solution to real world problems

Mapping of Course Outcomes to Program Outcomes:

CO/PO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	3	2	3	1	3	2	2	2	-	1	-	3
CO2	3	3	3	2	3	2	2	2	-	1	-	3
CO3	2	2	3	3	2	2	2	2	-	1	-	3
CO4	2	2	3	3	2	2	2	2	-	1	-	3

List of programs:

Experiment No.	Experiment
PART-A	
1	Design and Implement a Java program that prints all real solutions to the quadratic equation ax2 + bx + c=0. Read in a, b, c from the user and use the quadratic formula. If the discriminant b2 – 4ac is negative, display a message stating that there are no real solutions.
2	The Fibonacci sequence is defined by the following rule. The first two values in the sequence are 1 and 1. Every subsequent values is the sum of the two values preceding it. Implement a java program that uses both a. recursive function b. non recursive functions to print the nth value in the fibonacci sequence.
3	Design and implement an algorithm to accept an array of 5 positive integers. The algorithm must then find the smallest positive integer in the array which cannot be formed from the sum of 2 numbers in the array.
4	Develop a Java program to count the frequency of words, characters in the given line of text provided by user. Also display the words in the line in ascending order.
5	Design and Develop a simple Java program to find the longest substring without repeating characters in a given String. Accept the String through CommandLine argument.
6	Given a string and a non-empty word string, return a string made of each char just before and just after every appearance of the word in the string. Ignore cases where there is no char before or after the word, and a char may be included twice if it is between two words. • If inputs are "abcXY123XYijk" and "XY", output should be "c13i". • If inputs are "XY123XY" and "XY", output should be "13". If inputs are "XY1XY" and "XY", output should be "11". Develop a Java program for the same.
PART-B	
7.	Design a class that can be used by a health care professional to keep track of a patient's vital statistics. Here's what the class should do: • Construct a class called Patient • Store a String name for the patient • Store weight and height for patient as doubles • Construct a new patient using these values • Write a method called BMI which returns the patient's BMI as a double. BMI can be calculated as BMI = (Weight in Pounds / (Height in inches x Height in inches)) x 703 Next, construct a class called "Patients" and create a main method. Create a Patient object and assign some height and weight to that object. Display the BMI of that patient.

8.	A library needs to develop an online application for two types of users/roles, Adults and children. Both of these users should be able to register an account. Any user who is less than 12 years of age will be registered as a child and they can borrow a "Kids" category book for 10 days, whereas an adult can borrow "Fiction" category books which need to be returned within 7 days. Develop Interfaces and classes for the categories mentioned above. 1. Create an interface LibraryUser with the following methods declared, • Method Name • registerAccount • requestBook 2. Create 2 classes "KidUsers" and "AdultUser" which implements the LibraryUser interface. 3. Both the classes should have two instance variables as specified below. • Instance variables Data type • age int • bookType String 4. The methods in the KidUser class should perform the following logic. registerAccount function: • if age < 12, a message displaying "You have successfully registered under a Kids Account" should be displayed in the console. • If(age>12), a message displaying, "Sorry, Age must be less than 12 to register as a kid" should be displayed in the console. • requestBook function: • if bookType is "Kids", a message displaying "Book Issued successfully, please return the book within 10 days" should be displayed in the console. • Else, a message displaying, "Oops, you are allowed to take only kids books" should be displayed in the console. 5. The methods in the AdultUser class should perform the following logic. registerAccount function: • if age > 12, a message displaying "You have successfully registered under an Adult Account" should be displayed in the console. • If age<12, a message displaying, "Sorry, Age must be greater than 12 to register as an adult" should be displayed in the console. • requestBook function: • if bookType is "Fiction", a message displaying "Book Issued successfully, please return the book within 7

	days" should be displayed in the console. • Else, a message displaying, "Oops, you are allowed to take only adult Fiction books" should be displayed in the console. 6. Create a class "LibraryInterfaceDemo.java" with a main method which performs the above functions.
9.	Develop a Program to take care of Number Format Exception if user enters values other than integer for calculating average marks of 2 students. The name of the students and marks in 3 subjects are taken from the user while executing the program. • In the same Program write your own Exception classes to take care of Negative values and values out of range (i.e. other than in the range of 0-100) • Include finally to output the statement "Program terminated".
10.	Create class of SalesPersons as a thread that will display fives sales persons name. Create a class as Days as other Thread that has array of seven days. Call the instance of SalesPersons in Days and start both the Threads. Suspend SalesPersons on Sunday and resume on Wednesday. Use Thread handling Apis to perform the same.
11.	Create an Employee class with the related attributes and behaviors. Create one more class EmployeeDB which has the following methods. • booleanaddEmployee(Employee e) • booleandeleteEmployee(int eCode) • String showPaySlip(int eCode) • Employee[] listAll() Use an ArrayList which will be used to store the employees and use enumeration/iterator to process the employees. Write a Test Program to test that all functionalities are operational.
12.	Create a HashMap to create a Telephone book storing name and phone number. Write a program so that when a name is given, corresponding phone number should be given back

For SEE Examination:

- One experiment from part A & One experiment from part B to be given
- Examination will be conducted for 50 marks and scaled down to 25 marks
- Marks Distribution : Procedure write-up – 20%
  Conduction – 60%
  Viva – Voce – 20%
- Change of the experiment is allowed only once and procedure write-up marks will be considered as '0'

CO2	3	2	2	2	3	1	1	1	-	-	-	1
CO3	3	2	2	2	3	1	1	1	-	-	-	1
CO4	3	2	2	2	3	1	1	1	-	-	-	1

Experiment No.	Experiment
	PART-A
1	Design, Develop and Implement Basics of UNIX commands.
2	Design, Develop and Implement a Program to implement a shell.
3	Design, Develop and Implement a program to change current working

	directory and display the inode details for each file in the new directory
4	Design, Develop and Implement a Parent process – Child process Relationship.
5	Design, Develop and Implement a Program that creates a child process. Parent process writes data to pipe and child process reads the data from pipe and prints it on the screen.
6	Design, Develop and Implement a Program for Process system calls.
	PART-B
7	Design, Develop and Implementation of CPU scheduling by using a) Round Robin b) FCFS
8	Design, Develop and Implement Implementation of CPU scheduling by using a) Shortest job first b) Priority
9	Design, Develop and Implement File management system calls: a). create a file b). Copy one file to another c). Linking a file d). Delete a file.
10	Write a program that demonstrates how two processes can share a variable using semaphore
11	Design, Develop and Implement an Algorithm for Dead Lock Detection
12	Design, Develop and Implement a Program by using page replacement algorithms for virtual memory management

For SEE Examination:

- One experiment from part A & One experiment from part B to be given
- Examination will be conducted for 50 marks and scaled down to 25 marks
- Marks Distribution : Procedure write-up – 20%
  Conduction – 60%
  Viva – Voce – 20%
- Change of the experiment is allowed only once and procedure write-up marks will be considered as '0'

CIE - Continuous Internal Evaluation (25 Marks)

Bloom's Category	**Tests (25 Marks**
Remember	-
Understand	5
Apply	10
Analyze	5
Evaluate	-
Create	5

SEE – Semester End Examination (25 Marks)

Bloom's Taxonomy	Marks
Remember	-
Understand	5
Apply	10
Analyze	5
Evaluate	-
Create	5

MINI PROJECT

Course Code : 19ISE49 **Credits : 2**
CIE Marks : 25 **SEE Marks : 25**
Exam Hours : 3

Course Outcomes: At the end of the Course, the Student will be able to:

CO1	Analyze the Real world problem through survey of existing problems
CO2	Design the modules for solving the problems identified
CO3	Implement the design modules with suitable programming language
CO4	Test the working modules at different levels

Mapping of Course Outcomes to Program Outcomes:

CO/PO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	3	3	3	2	3	-	1	1	3	1	3	2
CO2	3	3	3	2	3	-	1	1	3	1	3	2
CO3	3	3	3	2	3	-	1	1	3	1	3	2
CO4	3	3	3	2	3	-	2	1	3	1	3	2

Use C,C++,Java, C#, PHP, Python, or any other similar front-end tool. All applications must be demonstrated on desktop/laptop as a stand-alone or web based application.

Note :

- Every student should do individual mini project in the areas suggested by the department expert committee

- Minimum 2 reviews will be conducted by the department expert committee to know the progress of the mini project work
- In each review student should give presentation on the work carried out and show the relevant models
- A mini project report should be submitted to the department at the end of the mini project work
- Plagiarism check for the report : Similarity index of the report should not exceed more than 25%

APPENDIX A

Outcome Based Education

Outcome-based education (OBE) is an educational theory that bases each part of aneducational system around goals (outcomes). By the end of the educational experience each student should have achieved the goal. There is no specified style of teaching or assessment in OBE; instead classes, opportunities, and assessments should all help students achieve the specified outcomes.

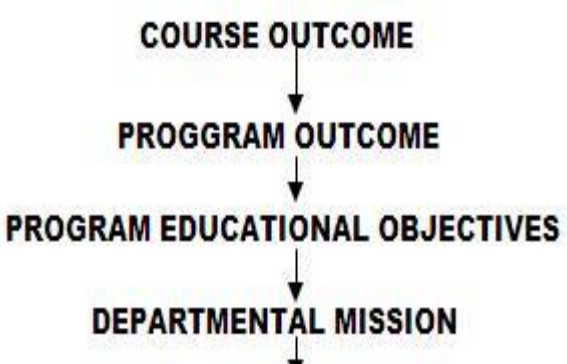
There are three educational Outcomes as defined by the National Board of Accreditation:

Program Educational Objectives: The Educational objectives of an engineering degreeprogram are the statements that describe the expected achievements of graduate in their career and also in particular what the graduates are expected to perform and achieve during the first few years after graduation. [nbaindia.org]

Program Outcomes: What the student would demonstrate upon graduation. Graduateattributes are separately listed in Appendix C

Course Outcome: The specific outcome/s of each course/subject that is a part of theprogram curriculum. Each subject/course is expected to have a set of Course Outcomes

Mapping of Outcomes



APPENDIX B

The Graduate Attributes of NBA

Engineering knowledge: Apply the knowledge of mathematics, science, engineeringfundamentals, and an engineering specialization to the solution of complex engineering problems.

Problem analysis: Identify, formulate, research literature, and analyze complex engineeringproblems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

Design/development of solutions: Design solutions for complex engineering problems anddesign system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

Conduct investigations of complex problems: The problems that cannot be solved bystraightforward application of knowledge, theories and techniques applicable to the engineering discipline that may not have a unique solution. For example, a design problem can be solved in many ways and lead to multiple possible solutions that require consideration of appropriate constraints/requirements not explicitly given in the problem statement (like: cost, power requirement, durability, product life, etc.) which need to be defined (modeled) within appropriate mathematical framework that often require use of modern computational concepts and tools.

Modern tool usage: Create, select, and apply appropriate techniques, resources, andmodern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

The engineer and society: Apply reasoning informed by the contextual knowledge to assesssocietal, health, safety, legal, and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

Environment and sustainability: Understand the impact of the professional engineeringsolutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

Ethics: Apply ethical principles and commit to professional ethics and responsibilities andnorms of the engineering practice.

Individual and team work: Function effectively as an individual, and as a member or leaderin diverse teams, and in multidisciplinary settings.

Communication: Communicate effectively on complex engineering activities with theengineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

Project management and finance: Demonstrate knowledge and understanding of theengineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

Life-long learning: Recognize the need for, and have the preparation and ability to engage inindependent and life-long learning in the broadest context of technological change.

APPENDIX C

BLOOM'S TAXONOMY

Bloom's taxonomy is a classification system used to define and distinguish differentlevels of human cognition—i.e., thinking, learning, and understanding. Educators have typically used Bloom's taxonomy to inform or guide the development of assessments (tests and other evaluations of student learning), curriculum (units, lessons, projects, and other learning activities), and instructional methods such as questioning strategies.
