

# NEW HORIZON COLLEGE OF ENGINEERING

Autonomous College Permanently Affiliated to VTU, Approved by AICTE & UGC  
Accredited by **NAAC** with 'A' Grade, Accredited by **NBA**

The Trust is a Recipient of Prestigious Rajyotsava State Award 2012 Conferred by the Government of Karnataka  
**Awarded Outstanding Technical Education Institute in Karnataka-2016**  
Ring Road, Bellandur Post, Near Marathalli, Bangalore -560 103, INDIA

Academic Year 2021-22  
ISE – Information Science & Engineering  
**Fifth and Sixth Semester**  
**Scheme and Syllabus**

## VISION

To evolve as a centre of academic excellence and advanced research in information science and engineering discipline and to endeavour the computational competence of students for their dream career achievement and enhancing the managerial and technical skills.

## MISSION

To inculcate students with profound understanding of fundamentals related to discipline, attitudes, skills and their application in solving real world problems, with an inclination towards societal issues and research.

### Program Education objectives (PEOs)

<b>PEO1</b>	To excel in their professional career with expertise in providing solutions to Information Technology problems.
<b>PEO2</b>	To pursue higher studies with profound knowledge enriched with academia and industrial skill sets.
<b>PEO3</b>	To exhibit adaptive and agile skills in the core area of Information Science & Engineering to meet the technical and managerial challenges.
<b>PEO4</b>	To demonstrate interpersonal skills, professional ethics to work in a team to make a positive impact on society.

### PEO to Mission Statement Mapping

<b>Mission Statements</b>	<b>PEO1</b>	<b>PEO2</b>	<b>PEO3</b>	<b>PEO4</b>
To prepare the students with academic and industry exposure by empowering and equipping them with necessary domain knowledge.	3	2	2	2
To prepare the students for global career in information technology with relevant technical and soft skills.	3	2	2	2
To encourage students to participate in co-curricular and extracurricular activities leading to the enhancement of their social and professional skills.	2	2	3	3

**Correlation:** 3- High, 2-Medium, 1-Low

## Program Specific Outcomes(PSO's)

**PSO1:** The ability to understand, analyze and develop computer programs in the areas related to algorithms, system software, multimedia, web design, big data analytics and networking or efficient design of computer based systems of varying complexity.

**PSO2:**The ability to apply standard practices and strategies in software project development using innovative ideas and open ended programming environment with skills in teams and professional ethics to deliver a quality product for business success.

## Program Outcomes (PO) with Graduate Attributes

	Graduate Attributes	Program Outcomes (POs)
1	Engineering Knowledge	<b>PO1:</b> The basic knowledge of Mathematics, Science and Engineering.
2	Problem analysis	<b>PO2:</b> An Ability to analyze, formulate and solve engineering problems.
3	Design and Development of Solutions	<b>PO3:</b> An Ability to design system, component or product and develop interfaces among subsystems of computing.
4	Investigation of Problem	<b>PO4:</b> An Ability to identify, formulate and analyze complex engineering problem and research literature through core subjects of Computer Science.
5	Modern Tool usage	<b>PO5:</b> An Ability to use modern engineering tools and equipments for computing practice.
6	Engineer and society	<b>PO6:</b> An Ability to assess societal, health, cultural, safety and legal issues in context of professional practice in Computer Science & Engineering.
7	Environment and sustainability	<b>PO7:</b> The broad education to understand the impact of engineering solution in a global, economic, environmental and societal context.
8	Ethics	<b>PO8:</b> An understanding of professional and ethical responsibility.
9	Individual & team work	<b>PO9:</b> An Ability to work both as individual and team player in achieving a common goal.
10	Communication	<b>PO10:</b> To communicate effectively both in written and oral formats with wide range of audiences.
11	Lifelong learning	<b>PO11:</b> Knowledge of contemporary issues, Management and Finance.
12	Project management and finance	<b>PO12:</b> An Ability to recognize the need and thereby to engage in independent and life-long learning for continued professional and career advancement.

### Mapping of POs with PEOs

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
<b>PEO1</b>	3	3	3	2	3	-	-	-	3	-	3	-

**FIFTH SEMESTER**

**(SYLLABUS)**

## WEB INTERNET PROGRAMMING

**Course Code: 20ISE51A**

**Credits: 03**

**L:T:PS : 3:0:0:0**

**CIE Marks: 50**

**Exam Hours: 3**

**SEE Marks: 50**

**Course Outcomes: At the end of the Course, the Student will be able to:**

<b>CO1</b>	Design web pages using XHTML and HTML5.
<b>CO2</b>	Apply Cascading Style Sheets to web pages.
<b>CO3</b>	Develop JavaScript programs to validate and create dynamic Webpages.
<b>CO4</b>	Develop server-side programs using PHP and accessing database through PHP.
<b>CO5</b>	Describe the methods to handle data through the web and design XML document.
<b>CO6</b>	Inspect the management of state in web applications and JavaScript frameworks like jQuery and Backbone which facilitates developer to focus on core features.

**Mapping of Course Outcomes to Program Outcomes:**

<b>CO/ PO</b>	<b>PO1</b>	<b>PO2</b>	<b>PO3</b>	<b>PO4</b>	<b>PO5</b>	<b>PO6</b>	<b>PO7</b>	<b>PO8</b>	<b>PO9</b>	<b>PO10</b>	<b>PO11</b>	<b>PO12</b>
<b>CO1</b>	3	3	3	3	3	-	-	-	-	-	-	3
<b>CO2</b>	3	3	3	-	-	-	-	-	-	-	-	3

<b>CO6</b>	3	3	3	-	-	-	-	-	-	-	-	3

**Mapping of Course Outcomes to Program Specific Outcomes:**

<b>CO</b>	<b>PSO1</b>	<b>PSO2</b>
<b>CO1</b>	3	3
<b>CO2</b>	3	3
<b>CO3</b>	3	3
<b>CO4</b>	3	3
<b>CO5</b>	3	3
<b>CO6</b>	3	3

Module No	Module Contents	Hours	COs
1	<p><b>XHTML:</b> Basic syntax, Standard XHTML document structure; Basic text markup, Images; Hypertext Links, Lists, Tables, Forms, Syntactic differences between HTML and XHTML.</p> <p><b>Cascading Style Sheets:</b> Introduction, Levels of style sheets, Style specification formats, Selector forms, The Box model, Background images, The &lt;span&gt; and &lt;div&gt; tags, Advanced CSS: Layout, Normal Flow, Positioning Elements, Floating Elements.</p>	9	CO1 CO2
2	<p><b>HTML 5:</b> Detecting HTML 5 features – Canvas, video, local storage, web workers, offline applications, geo-location, input types. What does it all mean – doctype, root, headers, articles, dates and times, navigation and footers. Let's call it drawing surface - Simple shapes, canvas, Paths, texts, gradients and images. A Form of madness.</p>	9	CO1
3	<p><b>JAVASCRIPT:</b> Overview of JavaScript, General syntactic characteristics, Screen output and keyboard input, Control statements, Object creation and modification, Arrays, Functions, Constructor, Pattern matching using regular expressions.</p> <p><b>JavaScript and DHTML Documents:</b> The Document Object Model, Element access in JavaScript, Events and event handling. Moving elements, Element visibility, Dynamic content, Slow movement of elements.</p>	9	CO3
4	<p><b>PHP Programming</b></p> <p>Origins and uses of PHP, Overview of PHP, General syntactic characteristics, Output, Control statements, Arrays, Functions, Pattern matching, Form handling, Files, Cookies, Session tracking, Database access with PHP and MySQL.</p>	9	CO4
5	<p><b>XML:</b> Introduction to XML, The Syntax of XML, Document structure, Document Type Definition (DTD), Displaying XML documents with CSS, XSLT style sheets.</p> <p><b>Managing State,</b> Passing Information via Query Strings, Passing Information via the URL Path, Serialization, jQuery Foundations, AJAX, Animation, JSON.</p>	9	CO5 CO6

## DESIGN AND ANALYSIS OF ALGORITHMS

Course Code : 20ISE52A

Credits : 04

L:T:P:S : 3:1:0:0

CIE Marks : 50

Exam Hours : 3

SEE Marks : 50

**Course Outcomes: At the end of the Course, the Student will be able to:**

<b>CO1</b>	Analyze algorithms in terms of space and time complexity.
<b>CO2</b>	Analyze and solve problems using brute force, divide and conquer, decrease and conquer and transform and conquer techniques.
<b>CO3</b>	Analyze and solve problems using greedy, dynamic programming, backtracking and branch and bound approaches.
<b>CO4</b>	Compare different classes of computational complexity.
<b>CO5</b>	Use string matching and parallel algorithm.
<b>CO6</b>	Apply appropriate algorithm design technique for a given problem.

**Mapping of Course Outcomes to Program Outcomes:**

CO/PO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
<b>CO1</b>	3	3	3	3	2	2	-	-	-	-	-	3
<b>CO2</b>	3	3	3	3	2	-	-	-	-	-	-	3
<b>CO3</b>	3	3	3	3	2	-	-	-	-	-	-	3
<b>CO4</b>	3	3	3	3	2	-	-	-	-	-	-	3
<b>CO5</b>	3	3	3	3	2	-	-	-	-	-	-	3
<b>CO6</b>	3	3	3	3	2	2	-	-	-	-	-	3

## NOSQL

Course Code : 20ISE551A

L:T:P:S : 3:0:0:0

Exam Hours : 3

Credits : 03

CIE Marks : 50

SEE Marks : 50

**Course Outcomes: At the end of the Course, the Student will be able to:**

<b>CO1</b>	Understand, compare and use the four types of NoSQL Databases (Document-oriented, Key-Value Pairs, Column-oriented and Graph).
<b>CO2</b>	Illustrate the Application and Integration of Databases
<b>CO3</b>	Apply the detailed architecture, define objects, load data, query data and performance tune Document-oriented NoSQL databases
<b>CO4</b>	understanding of the detailed architecture, define objects, load data, query data and performance tune Column-oriented NoSQL databases
<b>CO5</b>	Understanding of the detailed architecture, define objects, load data, query data and performance Key-Value Databases.
<b>CO6</b>	understanding of the detailed architecture, define objects, load data, query data and performance Graph NoSQL databases

**Mapping of Course Outcomes to Program Outcomes:**

**AUTOMATA THEORY AND FORMAL LANGUAGES**

**Course Code: 20ISE554A**

**Credits: 03**

**L:T:P:S :3:0:0:0**

**CIE Marks:50**

**Exam Hours: 3**

**SEE Marks:50**

**Course Outcomes: At the end of the Course, the student will be able to:**

<b>CO1</b>	Acquire a fundamental understanding of the core concepts in automata theory, construct Deterministic Finite Automata (DFA) and Non-deterministic Finite Automata (NFA) and ability to transform between equivalent finite automata.
<b>CO2</b>	Construct Epsilon-NFA and transform between equivalent finite automata also understand the power and the limitations of regular expressions and design regular expressions.

<b>CO3</b>	Compute transformation between finite automata and regular expressions and to minimize the DFA with equivalence technique.
<b>CO4</b>	Describe and construct Context Free Grammar and Pushdown Automata, transformation between them.
<b>CO5</b>	Construct and analyze the use and properties of Turing machines performing simple tasks, with recent trends and applications in the area of finite state machines.
<b>CO6</b>	Comprehend and manipulate the different concepts in automata theory and formal languages.

<b>PART-A</b>	
1	<p>Design a personal web page using HTML5 which should include:</p> <p>a.) A brief description about yourself.  b.) A small quote describing you.  c.) Your photo as the profile picture using canvas  d.) An index which should be a list of different headings/sections present in a document in the form of link which when clicked takes you to that heading/section</p> <p>The different sections:</p> <ul style="list-style-type: none"> <li>• Your educational details(Has to be displayed using a table)</li> <li>• Your hobbies/interests with small description about that particular hobby.</li> <li>• Your Achievements.</li> </ul> <p>Apply styles to the web page using CSS.</p>
2	<p>Using Linux platform with Apache, develop and demonstrate a XHTML file that includes Javascript script for the following problem:</p> <p>a) Input: A number n obtained using prompt  Output: The first n Fibonacci numbers</p> <p>b) input : A number  output : factorial of the number</p>
3	<p>Design and develop a XHTML document that includes JavaScript script to create stack of images such that images appear one top on another with images slightly visible. Whenever cursor is placed on an image that image should be completely visible and on moving cursor out image should go back to original position.</p>
4	<p>Develop and demonstrate, using Javascript, a XHTML document that collects the USN ( the valid format is: A digit from 1 to 4 followed by two upper-case characters followed by two digits followed by two upper-case characters followed by three digits; no embedded spaces allowed) and semester (valid format digit from 1 to 8) of the user. Event handler must be included for the form element that collects this information to validate the input. Messages in the alert windows must be produced when errors are detected.</p>

5	Develop and demonstrate, using Javascript, a XHTML document that displays text “TEXT-GROWING” with increasing font size in the interval of 100ms in RED COLOR, when the font size reaches 50pt it displays “TEXT-SHRINKING” in BLUE color. Then the font size decreases to 5pt.												
6	<p>Design a web page using XHTML and PHP to process the data from a student marks card form. Student marks card form must collect the student name, USN and marks of any 3 subjects. The CGI program must compute the total marks, grade and the data must be sent back to the user as another XHTML document to display.</p> <p>Table for calculating the grade is given below:</p> <table border="1"> <thead> <tr> <th>Marks in Percentage</th> <th>Grade</th> </tr> </thead> <tbody> <tr> <td>&gt;=90</td> <td>A</td> </tr> <tr> <td>&gt;=80</td> <td>B</td> </tr> <tr> <td>&gt;=60</td> <td>C</td> </tr> <tr> <td>&gt;=40</td> <td>D</td> </tr> <tr> <td>&lt;40</td> <td>F</td> </tr> </tbody> </table>	Marks in Percentage	Grade	>=90	A	>=80	B	>=60	C	>=40	D	<40	F
Marks in Percentage	Grade												
>=90	A												
>=80	B												
>=60	C												
>=40	D												
<40	F												
7	Design a web page using XHTML and PHP to insert emp_id, emp_name and experience information entered by the user into a table created using MySQL and to display the current contents of this table. Also retrieve the details of the employee based on the emp_id as specified by the user.												
8	Design a web page using XHTML and PHP to store current date-time in a COOKIE and display the ‘Last visited on’ date-time on the web page upon reopening of the same page.												
9	Design an XML document with DTD specification to store information about a student in an engineering college affiliated to VTU. The information must include USN, Name, Name of the College, Brach, Year of Joining, and e-mail id. Make up sample data for 3 students. Create a CSS style sheet and use it to display the document.												
10	Design an XML document to store information about a student in an engineering college affiliated to VTU. The information must include USN, Name, Name of the College, Brach, Year of Joining, and e-mail id. Make up sample data for 2 students. Display the details using XSLT												

**For SEE Examination:**

- One experiment from the lot to be given
- Examination will be conducted for 50 marks and scaled down to 25 marks
- Marks Distribution : Procedure write-up – 20%  
Conduction – 60%  
Viva – Voce – 20%
- Change of the experiment is allowed only once and procedure write-up marks will be considered as ‘0’

**DESIGN AND ANALYSIS OF ALGORITHMS LABORATORY**

**Course Code : 20ISL57A**

**Credits : 1.5**

**L: T:P:S : 0:0:1.5:0**

**CIE Marks : 25**

**Exam Hours : 3**

**SEE Marks : 25**

**Course Outcomes: At the end of the Course, the Student will be able to:**

<b>CO1</b>	Analyze algorithms in terms of space and time complexity.
<b>CO2</b>	Implement problems using brute force, divide and conquer and decrease and conquer techniques.
<b>CO3</b>	Implement problems using greedy, dynamic programming and backtracking approaches.
<b>CO4</b>	Use different string-matching algorithms.

**Mapping of Course Outcomes to Program Outcomes:**

<b>CO/PO</b>	<b>PO1</b>	<b>PO2</b>	<b>PO3</b>	<b>PO4</b>	<b>PO5</b>	<b>PO6</b>	<b>PO7</b>	<b>PO8</b>	<b>PO9</b>	<b>PO10</b>	<b>PO11</b>	<b>PO12</b>

<b>CO4</b>	3	3	3	2	2	-	-	-	-	-	-	2

<b>Experiment No.</b>	<b>Experiment</b>
-----------------------	-------------------

<b>PART-A</b>	
1	Implement and analyze quick sort algorithm.
2	Implement and analyze merge sort algorithm
3	Implement and analyze topological sorting in a given directed graph.
4	Implement and analyze Kruskal`s algorithm and find minimum cost spanning tree of a given connected undirected graph.
5	Implement and analyze Prim`s algorithm and find minimum cost spanning tree of a given connected undirected graph.
6	Implement and analyze Dijkstra`s algorithm to find the shortest path from a given source.
<b>PART-B</b>	
7	Implement and analyze Floyd Warshall`s algorithm to find the shortest path between all pairs of vertices in a given weighted connected graph.
8	Implement travelling salesman problem using dynamic programming.
9	Implement 0/1 Knapsack problem.
10	Implement N-Queens problem using backtracking.
11	Implement sum of subset problem using backtracking.
12	Implement and compare Simple string matching and KMP string matching algorithm.

**For SEE Examination:**

- One experiment from part A & One experiment from part B to be given
- Examination will be conducted for 50 marks and scaled down to 25 marks
- Marks Distribution: Procedure write-up – 20%  
Conduction – 60%  
Viva – Voce – 20%
- Change of the experiment is allowed only once and procedure write-up marks will be considered as ‘0’

### DATA SCIENCE LABORATORY

Course Code : 20ISL58A

L:T:P:S : 0:0:1.5:0

Exam Hours : 3

Credits : 1.5

CIE Marks : 25

SEE Marks : 25

**Course Outcomes: At the end of the Course, the Student will be able to:**

<b>CO1</b>	Understand basic operations of NumPy,pandas and Matplotlib
<b>CO2</b>	Implement Regression models for the sample datasets
<b>CO3</b>	Develop classification models and optimize the performance
<b>CO4</b>	Develop clustering models and apply on suitable datasets

**Mapping of Course Outcomes to Program Outcomes:**

CO/PO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
<b>CO1</b>	3	3	3	2	3	-	1	1	-	1	-	1
<b>CO2</b>	3	3	3	2	3	-	1	1	-	1	-	1
<b>CO3</b>	3	3	3	2	3	-	1	1	-	1	-	1
<b>CO4</b>	3	3	3	2	3	-	2	1	-	1	-	1

Experiment No.	Experiment
<b>PART-A</b>	
1	Using pandas in python demonstrate the following operations for the sample dataset given, i) Indexing of Dataframe ii) Grouping and aggregating iii) Adding and removing attributes iv) Joining dataframes v) Filtering the data vi) Handling Missing values
2	Using pandas and Matplotlib demonstrate the following

	operations for the sample dataset given, i) Bar chart and Histogram ii) Comparing Distribution iii) Box plot and mention quartiles iv) Correlation using pairplot and heatmap v)
3	Using Numpy,pandas and Matplotlib demonstrate the following operations for the sample dataset given, i) Central tendency ii) Dispersion and Distribution iii) ANOVA iv) Hypothesis testing
4	Develop a program to implement Simple Linear Regression model and evaluate the model by verifying the performance
5	Develop a program to implement Multiple Linear Regression model and evaluate the model by verifying the performance
6	Develop a program to implement Logistic Regression and indicate the class label for the test dataset
<b>PART-B</b>	
7	Develop a program to implement Naive Bayes classifier model and analyze the model using confusion matrix
8	Develop a program to implement Decision Tree model and analyze the model using confusion matrix
9	Develop a program to implement Random Forest classifier model and analyze the model using confusion matrix
10	Develop a program to implement KNN classifier model and analyse the model using confusion matrix
11.	Develop a program to implement K Means clustering model for the given value of K, where K is number of clusters
12	Develop a program to implement Hierarchical clustering model for the given value of N, where N is number of clusters

**For SEE Examination:**

- One experiment from part A & One experiment from part B to be given
- Examination will be conducted for 50 marks and scaled down to 25 marks
- Marks Distribution : Procedure write-up – 20%  
Conduction – 60%  
Viva – Voce – 20%
- Change of the experiment is allowed only once and procedure write-up marks will be considered as ‘0’

<b>CO3</b>	3	3	3	2	3	-	1	1	3	1	3	2
<b>CO4</b>	3	3	3	2	3	-	2	1	3	1	3	2

**Note :**

- Mini project should be developed using the techniques learned in the course
- Every student should do mini project in a team of maximum 2 members in the areas suggested by the department expert committee
- Minimum 2 reviews will be conducted by the department expert committee to know the progress of the mini project work

- In each review student should give presentation on the work carried out and show the relevant models
- A mini project report should be submitted to the department at the end of the mini project work
- Plagiarism check for the report : Similarity index of the report should not exceed more than 30%.

## MOBILE APPLICATION DEVELOPMENT

**Course Code : 20ISE61A**

**Credits : 03**

**L:T:P:S : 3:0:0:0**

**CIE Marks : 50**

**Exam Hours : 3**

**SEE Marks : 50**

**Course Outcomes: At the end of the Course, the Student will be able to:**

<b>CO1</b>	Know the components and structure of mobile application development frameworks for Android and windows OS based mobiles.
<b>CO2</b>	Understand how to work with various mobile application development frameworks.
<b>CO3</b>	Apply the basic and important design concepts and issues of development of mobile applications.
<b>CO4</b>	Analyze the capabilities and limitations of mobile devices.
<b>CO5</b>	Develop the skills in designing and building mobile applications using android platform.
<b>CO6</b>	Build mobile applications using multimedia graphics and animations.

**Mapping of Course Outcomes to Program Outcomes:**

CO/PO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12

**SYSTEM MODELING AND SIMULATION****Course Code: 20ISE642A****L: T: P:S : 3:0:0:0****Exam Hours: 3****Credits: 03****CIE Marks: 50****SEE Marks: 50****Course Outcomes: At the end of the Course, the Student will be able to:**

<b>CO1</b>	Understand simulation needs, and to implement and test a variety of simulation models
<b>CO2</b>	Conceptualize real world situations related to systems development decisions
<b>CO3</b>	Discuss the simulation methods and select the suitable technique on the problems.
<b>CO4</b>	Generate and test random number variates and apply them to develop simulation models
<b>CO5</b>	Create a model prediction based upon new input and validate the output data.
<b>CO6</b>	Test validity of the model for various case studies like inventory, traffic flow networks, etc.

**Mapping of CO v/s PO:**

### **COMPILER DESIGN**

**Course Code: 20ISE644A**

**Credits: 03**

**L:T:P:S : 3:0:0:0**

**CIE Marks: 50**

**Exam Hours: 3**

**SEE Marks: 50**

**Course Outcomes: At the end of the Course, the student will be able to:**

<b>CO1</b>	Understand the basic concepts and application of Compiler Design
<b>CO2</b>	Apply their basic knowledge Data Structure to design Symbol Table, Lexical Analyzer
<b>CO3</b>	Understand and Implement a Parser-Top Down and Bottom Up Design
<b>CO4</b>	Understand strength of Grammar and Programming Language
<b>CO5</b>	Understand various Code optimization Techniques and Error Recovery mechanisms.
<b>CO6</b>	Comprehend and manipulate the different concepts in Compiler Design.

**Mapping of Course Outcomes to Program Outcomes:**

**OPERATIONS RESEARCH**

**Course Code: 20ISE645A**

**L: T: P:S : 3:0:0:0**

**Exam Hours: 3**

**Credits: 03**

**CIE Marks: 50**

**SEE Marks: 50**

**Course Outcomes: At the end of the Course, the Student will be able to:**

<b>CO1</b>	Realize the importance of Operations Research and explain the basic concepts.
<b>CO2</b>	Construct and Solve Linear Programming Problems for its optimal solutions by graphical method
<b>CO3</b>	Apply the concept of Simplex method and its extensions to Solve Linear Programming Problems for its optimal solutions
<b>CO4</b>	Solve specialized linear programming problems like assignment problems using various OR methods

<b>CO5</b>	<b>Solve</b> the problem of transporting the products from origins to destinations with least transportation cost.
<b>CO6</b>	Analyze network technique namely PERT/CPM and optimal project duration and cost

### Mapping of Course Outcomes to Program Outcomes

### C# & .NET

**Course Code : 20ISE653A**

**Credits : 03**

**L:T:P:S : 3:0:0:0**

**CIE Marks : 50**

**Exam Hours : 3**

**SEE Marks : 50**

**Course Outcomes: At the end of the Course, the Student will be able to:**

<b>CO1</b>	Understand the technologies of the .NET framework
<b>CO2</b>	Understand the basic and object oriented concepts in C#.
<b>CO3</b>	Model the real world entities as classes and objects using C# object oriented programming concepts.
<b>CO4</b>	Apply exception handling and gain efficient testing, debugging skills C#.
<b>CO5</b>	Applying interfaces and Events in C# programming.
<b>CO6</b>	Develop Windows applications based on C# programming libraries and .NET framework.

**Mapping of Course Outcomes to Program Outcomes:**

**L:T:P:S : 0:0:1:0**

**Exam Hours : 3**

**Credits : 1**

**CIE Marks : 25**

**SEE Marks : 25**

**Course Outcomes: At the end of the Course, the Student will be able to:**

<b>CO1</b>	Design and develop a Mobile App for smart phones
<b>CO2</b>	Design User Interface and develop activity for Android App
<b>CO3</b>	Design and implement Database Application and Content providers
<b>CO4</b>	Create Android App with SMS camera and Location based services

**Mapping of Course Outcomes to Program Outcomes:**

CO/PO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
<b>CO1</b>	3	3	3	2	3	-	1	1	-	1	-	1
<b>CO2</b>	3	3	3	2	3	-	1	1	-	1	-	1
<b>CO3</b>	3	3	3	2	3	-	1	1	-	1	-	1
<b>CO4</b>	3	3	3	2	3	-	2	1	-	1	-	1

Experiment No.	Experiment
<b>PART - A</b>	
1.	Using Android SDK develop an activity which displays the below message. Hello world android app
2.	Design and implement a single screen app that displays information about a small business.eg. Restaurant, Book shop etc. . Your design must include: <ul style="list-style-type: none"> <li>○ Business name</li> <li>○ Photo of business</li> <li>○ Contact information</li> </ul>
3.	Design and develop a Mobile App for smart phones The Easy Unit Converter using Android.
4.	Design and develop a Mobile App for smart phones Currency Converter.
5.	Design an app for Tourist spot: With three activities, Welcome page, Display attractions of tourist spot and Webpage of the tourist spot
<b>PART - B</b>	
6.	Design an android app play music in background
7.	Design and develop a Mobile App for smart phones The Expense Manager using Android. The application should store all the expenses in a file
8.	Design and develop Health Monitoring App using Android. The app will store the blood pressure, blood group and glucose level of patient in SQLite database
9.	Develop an android app to display Map of your college locality
10.	Develop an android app to alert SMS to one given phone number.

**For SEE Examination:**

- One experiment from part A & One experiment from part B to be given
- Examination will be conducted for 50 marks and scaled down to 25 marks
- Marks Distribution : Procedure write-up – 20%
  - Conduction – 60%
  - Viva – Voce – 20%
- Change of the experiment is allowed only once and procedure write-up marks will be considered as ‘0’

**ADVANCED JAVA LABORATORY**

**Course Code : 20ISL67A**

**Credits : 1.5**

**L:T:P:S : 0:0:1.5:0**

**CIE Marks : 25**

**Exam Hours : 3**

**SEE Marks : 25**

**Course Outcomes: At the end of the Course, the Student will be able to:**

<b>CO1</b>	Apply event handling mechanism in Java based GUI programming.
<b>CO2</b>	Illustrate database access and details for managing information using the JDBC API
<b>CO3</b>	Describe how Servlets and JSP fit into Java-based web application architecture
<b>CO4</b>	Demonstrate the usage of frameworks Spring in J2EE based application development

**Mapping of Course Outcomes to Program Outcomes:**

CO/PO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
<b>CO1</b>	3	3	3	2	1	2	1	1	2	-	-	2
<b>CO2</b>	3	3	3	2	1	2	1	1	2	-	-	2
<b>CO3</b>	3	3	3	2	1	2	1	1	2	-	-	2
<b>CO4</b>	3	3	3	2	1	2	1	1	2	-	-	2

Experiment No.	Experiment
<b>PART-A</b>	
1	Design and create a swing based simple calculator program to perform basic arithmetic operations.
2	Design and demonstrate loading of file in a Swing Component.
3	Design and develop a swing based application to count the number of times a specific button is clicked by the user, apply event handling mechanism.
4	Design, Develop and Implement a JDBC program using statement object to display the Employee information to the console. Assume suitable columns and rows for the Employee table and JDBC drivers.

5	Design, Develop and Implement a JDBC based program using Prepared statement object to perform update operation and display the updated Product data. Assume suitable columns for the Product table and JDBC drivers.
6	Design, Develop and Implement a JDBC based program using callable statement to execute a stored SQL procedure to display the details of a student matching the USN provided, from student table. Assume suitable columns and rows for the Student table and JDBC drivers.
<b>PART-B</b>	
7	Develop a library home page with option to search all books written by a particular author. Use servlet to make DB connectivity and JSP to display the list of books in tabular fashion to the client. In case of error, JSP page must display error message to client. Assume suitable Data Base and drivers. Table can have columns author name and book title.
8	Design and develop a user login page and authenticate the user in a JSP page using database. Assume user name and password to be the column of the USER database. Establish connectivity using JDBC drivers.
9	Create a HTML Page, which asks the user to enter a number in a textbox. On clicking the submit button, it places the request to a Servlet. The Servlet generates all Prime numbers which are less than the given number and adds them to an ArrayList and forwards the control to a JSP page. The JSP page iterates through the ArrayList and prints them in a tabular format. Apply RequestDispatcher methods to achieve the same.
10	Design a Seminar registration form with Candidate Name, Email id, Favourite Courses enrolled. Apply usebean tag in JSP to receive and send the data to Candidate Java Bean and reply with successful registration and display the registered data.
11.	Create a Spring based examination conduction application to demonstrate the concept of dependency injection. Bean USER has the properties id, name, email id. Bean ANSWER has attributes id, answer, postedDate. Bean QUESTION has id, name, answer.
12	Design and develop a user login based web application based on Spring Model view Controller (MVC) components.

**For SEE Examination:**

- One experiment from part A & One experiment from part B to be given
- Examination will be conducted for 50 marks and scaled down to 25 marks
- Marks Distribution : Procedure write-up – 20%  
Conduction – 60%  
Viva – Voce – 20%

<b>CO3</b>	3	3	3	2	3	-	1	1	-	1	-	1
<b>CO4</b>	3	3	3	2	3	-	2	1	-	1	-	1

Experiment No.	Experiment
<b>PART-A</b>	
1	Implement and demonstrate the Principal Component Analysis for dimensionality reduction. Read the training data set from a .CSV file.
2	For a given set of training data examples stored in a .CSV file, implement and demonstrate the Document classifier using Naïve Bayes.
3	Develop a program to demonstrate the working of the decision tree based CHAID algorithm. Use an appropriate data set for building the decision tree and apply this knowledge to classify a new sample.
4	Develop a program to demonstrate the working of the Regression tree based CART algorithm. Use an appropriate data set for building the decision tree and apply this knowledge to classify a new sample.
5	Develop a program to demonstrate the working of the Gradient Descent algorithm. Use an appropriate data set for building the model and apply this knowledge to predict a value for a test case.
6	Develop a program to construct Support Vector Machine considering a Sample Dataset.
<b>PART-B</b>	
7	Implement a program in python to illustrate the Bias Variance Trade-off in a machine learning model
8	Implement and demonstrate the Association Rule Mining using Apriori Algorithm.
9	Implement and demonstrate the Association Rule Mining using FP-Growth Algorithm.
10	Build an Artificial Neural Network by implementing the Back propagation algorithm and test the same using appropriate data sets.
11.	Build a Convolutional Neural Networks and test the same using appropriate data sets.
12	Implement Q learning algorithm.

**For SEE Examination:**

- One experiment from part A & One experiment from part B to be given
- Examination will be conducted for 50 marks and scaled down to 25 marks
- Marks Distribution: Procedure write-up – 20%  
Conduction – 60%  
Viva – Voce – 20%

## MINI PROJECT

**Course Code : 20ISE69A**

**Credits : 2**

**L:T:P:S :0:0:2:0**

**CIE Marks : 25**

**SEE Marks : 25**

**Exam Hours : 3**

**Course Outcomes: At the end of the Course, the Student will be able to:**

<b>CO1</b>	Analyze the Real world problem through survey of existing problems
<b>CO2</b>	Design the modules for solving the problems identified
<b>CO3</b>	Implement the design modules with suitable programming language
<b>CO4</b>	Test the working modules at different levels

**Mapping of Course Outcomes to Program Outcomes:**

CO/PO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
<b>CO1</b>	3	3	3	2	3	-	1	1	3	1	3	2
<b>CO2</b>	3	3	3	2	3	-	1	1	3	1	3	2
<b>CO3</b>	3	3	3	2	3	-	1	1	3	1	3	2
<b>CO4</b>	3	3	3	2	3	-	2	1	3	1	3	2

**Note :**

- Mini project should be developed using the techniques learned in the course 20ISE51 - Web Internet Programming
- Every student should do mini project in a team of maximum 2 members in the areas suggested by the department expert committee
- Minimum 2 reviews will be conducted by the department expert committee to know the progress of the mini project work
- In each review student should give presentation on the work carried out and show the relevant models
- A mini project report should be submitted to the department at the end of the mini project work
- Plagiarism check for the report : Similarity index of the report should not exceed more than 30%.

## APPENDIX A

### Outcome Based Education

**Outcome-based education** (OBE) is an educational theory that bases each part of an educational system around goals (outcomes). By the end of the educational experience each student should have achieved the goal. There is no specified style of teaching or assessment in OBE; instead classes, opportunities, and assessments should all help students achieve the specified outcomes.

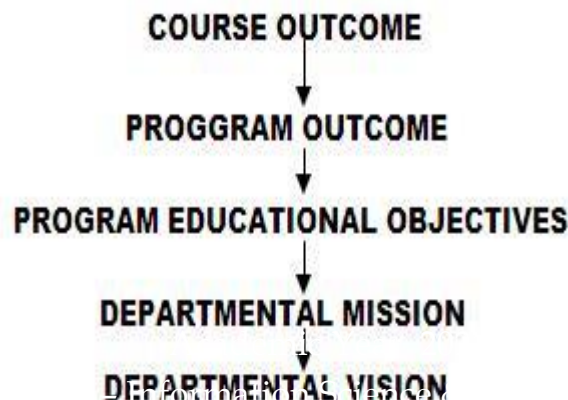

There are three educational Outcomes as defined by the National Board of Accreditation:

**Program Educational Objectives:** The Educational objectives of an engineering degree program are the statements that describe the expected achievements of graduate in their career and also in particular what the graduates are expected to perform and achieve during the first few years after graduation. [nbaindia.org]

**Program Outcomes:** What the student would demonstrate upon graduation. Graduate attributes are separately listed in Appendix C

**Course Outcome:** The specific outcome/s of each course/subject that is a part of the program curriculum. Each subject/course is expected to have a set of Course Outcomes

### Mapping of Outcomes

## APPENDIX B

### The Graduate Attributes of NBA

**Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**Problem analysis:** Identify, formulate, research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**Conduct investigations of complex problems:** The problems that cannot be solved by straightforward application of knowledge, theories and techniques applicable to the engineering discipline that may not have a unique solution. For example, a design problem can be solved in many ways and lead to multiple possible solutions that require consideration of appropriate constraints/requirements not explicitly given in the problem statement (like: cost, power requirement, durability, product life, etc.) which need to be defined (modeled) within appropriate mathematical framework that often require use of modern computational concepts and tools.

**Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal, and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

**Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

**Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

## APPENDIX C

### BLOOM'S TAXONOMY

**Bloom's taxonomy** is a classification system used to define and distinguish different levels of human cognition—i.e., thinking, learning, and understanding. Educators have typically used Bloom's taxonomy to inform or guide the development of assessments (tests and other evaluations of student learning), curriculum (units, lessons, projects, and other learning activities), and instructional methods such as questioning strategies.
